Skills

Languages: C, C++, Java, JavaScript, PHP
Frameworks: HTML and CSS, NodeJS, React JS
Tools/Platforms: MySQL, MongoDB, Git and GitHub
Soft Skills: Problem-Solving, Curious and Creative, Time Management, Adaptability

Projects

Recipe Recommendation Website | Github Dec 2025

- Designed and developed a scalable MERN stack web application that provides intelligent recipe recommendations based on user-selected ingredients and filters.
- Engineered RESTful APIs with Node.js and Express.js and optimized MongoDB queries to improve data retrieval performance.
- Implemented JWT-based authentication and responsive UI design to enhance security, usability, and overall user experience.

Tech: ReactJS, NodeJS, MongoDB

Tourist Management System – Developed a Dynamic Tourist Management System | Github Apr 2025

- Architected and developed a scalable Tourist Management Web Application with modular backend structure, supporting destination listings, package customization, and automated booking workflows.
- Optimized MySQL queries and database relationships to improve performance and maintain data integrity across tourists, destinations, and bookings modules.
- Integrated secure authentication mechanisms, input validation, and structured MVC-based development approach to enhance maintainability and system security.

Tech: HTML, CSS, PHP (Backend), MySQL (Database)

Event Management and Ticket Booking Website | Github Dec 2023

- Designed and developed a fully responsive ticket booking web application with structured multi-page navigation and intuitive user interface.
- Implemented JavaScript-based client-side validation and dynamic DOM updates to improve interaction flow and minimize user input errors.
- Applied clean UI/UX principles and optimized layout techniques to deliver consistent performance across desktop, tablet, and mobile devices.

Tech: HTML, CSS, JavaScript

Training

Cipher Schools (Edtech Company) Certificate Jul 2025

Data Structures and Algorithms using Java Programming

- Designed and developed a console-based project titled Mental Health Simulator, applying core concepts such as Stack, Queue, Linked List, and BST.
- Gained practical experience in choosing and implementing efficient data structures for problem-solving.
- Strengthened programming fundamentals and analytical skills through structured learning and real-world coding tasks.

Certificates

- Git and GitHub | Cipher Schools Feb 2026
- Build Generative AI Apps and Solutions with No-Code Tools | Infosys Aug 2025
- ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM | Infosys Aug 2025
- Java programming | IAMNEO May 2025
- Cloud Computing | NPTEL Apr 2025
- Legacy Responsive Web Design | FreeCodeCamp Nov 2023

Extra Curricluar Activities

- Participated in the Code Off Duty – A Web Hackathon showcasing Problem Solving Skills. Mar 2024

Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; **CGPA: 6.28** Present, Aug 2023
- **Sri Chaitanya Junior College** Vijayawada, Andhra Pradesh
  Intermediate; **Percentage: 79** Mar 2023
- **Arunodaya High School** Srikakulam, Andhra Pradesh
  Secondary School Education; **Percentage: 100** Mar 2021
